

WELDAS COMPANY USA

WELDAS ANNIVERSARY !

Weldas, the USA based company, started to sell its quality products in the USA and Canada 25 years ago. Since then they have built a solid reputation as a manufacturer of personal protection products for the welder. Constant development of new products makes the company the worldwide leader for the welding professional. Brandnames like COMFOflex, DEERSOsoft, STEERSOtuff, SWEATSOpad, Lava Brown, Yellow Jacket, Fire Fox and more are very well known in the market. The company works also with a specific market philosophy that covers the world market, for example: if one likes to buy a certain Weldas product number in Melbourne, New York, Berlin or Shanghai: it will always be the same quality .

10 Years ago Weldas started also to sell its products in Europe which means that the company celebrates 2 anniversaries this year, so also:

WELDAS EUROPE

Starting in Europe was the main reason for Weldas to go for testing and certification of their products according to the right norm of application for each product. This meant also that their factory had to be a true ISO 9001 manufacturing site in order, not only, to achieve a certain quality level of production but also to maintain that quality level of production. For this they started co-operation with TÜV in Germany in order to do the ISO auditing as well as the testing and certification on the Weldas products. For information on this, Weldas invites you to visit their, multilingual, web site: www.weldas.com so that you can find out everything about the products and the company.

WELDAS: *The Professional's Choice* !
