- EN 407
- EN 388

Sizes

L (9), XL (9 1/2), XXL (10 1/2)

Description

COMFOflex® Welding Glove 10-2750

The Weldas ***COMFOflex***® 10-2750 Prestigious cowhide leather welding glove is designed for professional welders who require maximum durability and reliable

heat protection in demanding industrial environments. Manufactured from premium grade A cowhide leather, the glove provides excellent resistance to heat, sparks and abrasion, making it particularly suitable for heavy-duty welding applications.

Cowhide leather is known for its robust structure and long service life, offering superior protection when handling high temperatures and rough materials. This makes the 10-2750 an ideal choice for welders working in intensive environments where durability is a priority.

To enhance wearer comfort, the glove features a ***COMFOflex®*** lined back that supports heat absorption and moisture management during extended use. The unlined palm ensures adequate flexibility and control, allowing the user to maintain a good balance between protection and handling performance.

Reinforced thumb and palm areas increase durability in critical wear zones, while multi-ply ***KEVLAR®*** stitching minimizes seam burnout under thermal stress. Designed for consistent performance, the 10-2750 is a dependable solution for professionals who prioritize protection, durability and long-term cost efficiency.

“We use the 10-2750 in our heavy welding operations where durability is critical. The cowhide leather holds up extremely well against heat and rough materials, and the reinforced areas really extend the glove’s lifespan. It’s a strong, reliable glove for demanding work.” – Production Supervisor

Features

- Designed for MIG/MAG and MMA welding applications
- Hand made of class A grain and split cowhide for durability and heat resistance
- Cuff made of split cowhide
- ***COMFOflex®*** lined back for added thermal comfort
- Unlined palm design for excellent dexterity and precise control

- 4 and 5 ply ***KEVLAR®*** stitching for high heat and wear resistance
- Reinforced thumb for increased durability in high-wear areas
- Suitable for professional and industrial welding environments
- 30% welting for stich protection
- Lining sewn into the fingers for improved comfort and easy donning
